# Why LEDs?

LED's are a cutting-edge technology that is set to revolutionise illuminated signage. The benefits of LED's clearly outweigh the benefits older technologies such as neon.

LED's use a chemical reaction to produce light so they need very little power and last over 100,000 hours before burning out.

Unlike neon, LED's operate on a very low voltage and therefore eliminate the need for large, expensive transformers which are so often the weakest link in neon signs. This also means that an LED sign can be installed by ANYONE- all you need to do is hang it in your window and plug it in.

A large and ever-expanding range of LED signs is available- our current designs can be seen overleaf.

Hanging chains are provided along with an 8ft mains lead. Demonstrations can be seen in our shop- they have to be seen to be believed.
